

# PLANTING A MINI FOREST IV

## Block Seminar

Angewandte Literatur- und Kulturwissenschaften (155103)

**5-9 OCT. 2026, 10:00-15:00**

Do you like hands-on learning? Are you interested in reforestation, conservation, and sustainable practices? Continuing in WiSe 2026/27, a mini forest, Garden(s) of Refuge, is being planted and maintained to draw attention to forced migration and environmental degradation.

During the seminar, you will read texts about urban greening, maintain the emerging forest, do additional planting, and personally take action against climate change. You will also have the opportunity to participate in the official opening of Garden(s) of Refuge at a conference on 15-16 Oct. *Planting a Mini Forest IV* can be taken independently or in sequence. To register, email [vanessa.agnew@tu-dortmund.de](mailto:vanessa.agnew@tu-dortmund.de).
